Harvard Club of Cape Cod

Probing the Ocean's Depths: the Awesome Power of Marine Robotics

Special Guest and Speaker
Dr. James Bellingham, Director, Center for Marine Robotics, WHOI
This event is hosted by the MIT Club of Cape Cod
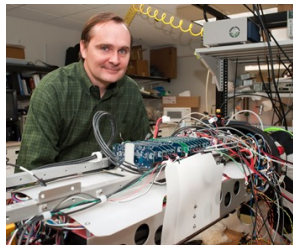

MEETING DATE: Wednesday, February 17, 2016
TIME: 11:30 AM: Cash bar -- 12:00 Noon: Luncheon
PLACE: The Coonamessett Inn
DIRECTIONS: 311 Gifford St., corner of Jones Road, Falmouth

It has been said that we know less about the ocean depths than we do about the surface of Mars -- even though 71% of the earth is covered by water. Marine robotics, a discipline still in its infancy, has the potential to transform our understanding of this vast realm.

Come join members of the MIT Club of Cape Cod in welcoming MIT alumnus James Bellingham, Director of WHOI's Center for Marine Robotics, to tell us more about the very important work now taking place there.

Before becoming the Center's first director, Dr. Bellingham was director of engineering and chief technologist at the Monterey Bay Aquarium Research Institute. Earlier, he was founder and manager of MIT's Autonomous Underwater Vehicle Laboratory, as well as a co-founder of Bluefin Robotics (later acquired by Battelle), which develops, builds and operates autonomous underwater vehicles (AUVs).

Come join us for a delicious lunch and this deep dive into an endlessly fascinating subject.

Please complete this form and mail it with your check. Only reservations received by Wednesday, February 10 with payment can be accepted. No phone reservations or walk-ins please.

Member's Name and Alumni Group _____

Email Address _____

Guest Name(s) _____

Caesar Salad • Entrée • Apple Pie • Coffee and Tea
Full menu: http://www.ref.harvardclub.info/menu/20160217.html

Selection(s): Petite Salmon Filet _____   Chicken Piccata _____   Vegetarian _____
Cost per person $28.00   Number of persons _____   Total Enclosed _____
